**Background of the forum**

Aluminum fabrication has replaced aluminum smelting to become an investment hotspot of China’s nonferrous metals industry in recent years. China’s aluminum fabrication industry completed a fixed assets investment of nearly RMB200bln yuan in 2014, taking more than one half of total investment of nonferrous metals fabrication industry, the growth rate has been above 25% for several years, scale of single project and investment in technology and equipments increase constantly, industrial scale and comprehensive power are enhanced gradually; however, with constant expansion of industrial scale, problems such as decline of operation rate, poor innovation ability, weak profitability, etc, are emerging, which show that China’s aluminum fabrication industry is now undergoing a critical stage of structural adjustment, transformation and upgrading, while, improvement of aluminum application level and cultivation of new growth points of consumption have become necessary guarantees for future sustainable development of China’s aluminum fabrication industry.

As a kind Green Metal, Aluminum has excellent characteristics such as lightweight and easy to recycle, etc. New concepts of Using Aluminum to Save Steel, Copper and Wood, etc, have obtained widely attentions. Exploring new aluminum applications have become hot topics in production and application sectors.

Exhibition of Aluminum China 2015 will be held in Shanghai New International Expo Center during July 8-10 of 2015, echoing with 2015 China Aluminum Fabrication Forum.
